Comments: I have major concerns with the proposed drilling project. We need to prioritize protecting our green spaces! I'm concerned with the effects this project will have on the water and wildlife in this area. As an avid biker, hiker, and camper I'm extremely concerned with the environmental effects of the proposed project. I am asking for a complete EIS to make sure that the full impact is being considered. Once these places are ruined, we can't get them back. Tourism is a major aspect of South Dakota economy that should be considered as well.
