Title:

Comments: Hi, I'm Emily Nachatilo. Hearing about mining in the canyon is beyond irrational. I just don't see why the Black Hills needs more gold, nor the less needs more money. I really question, if you truly truly think this is best for everything and everyone. Have you thought of our drinking water, the beauty of the Canyon and let's not forget the Native Americans. Even though Native Americans aren't everyone's favorite ethnicity, just think what it does to them. Us. The people. We don't take harming the earth lightly. So before y'all think about drilling a mine in to the most beautiful place I've ever seen in the black hills by far, just take a step back and truly think.
