Title:

Comments: Keep the trails!!! Continuing with the mining operation will destroy many mountain biking and hiking trails in gorgeous wilderness, on public land. The loss of the network will have a ripple effect, causing cycle and outdoor shops to lose a significant amount of business and revenue. It also means that a way many people are staying healthy and in shape will be lost, leading to an uptick in general unhealthiness. It is also one of the increasingly few land preserves where flora and fauna can flourish. Removal is a very ill-advised decision.
