Comments: I've got a big concern with drilling in the black hills area. Forest service land shouldn't be distributed for exploratory drilling or mining. What about the elk, deer and other wildlife this activity would disrupt? What about the use of the trails in this area, will they be shut down or restricted? Ranchers rely on this area to run cattle and i can't help but think this activity would hurt their grazing management plan. I think that an EIS {{full NEPA study}} should be completed before this activity has any right to drill or possibly mine in this area. I have seen the effects of such activities in other parts of the Black Hill and don't feel we need this.
