Comments: The Golden Crest Exploration Drilling project will not only risk negatively impacting the ecology of the area but will have a human impact as well. The hiking and biking trails in this area are a vital public resource that all in the community deserve to benefit from, not just those few who would benefit from a mining operation. It would be a travesty and oh so backwards if these public lands were to be used in this way. A full environmental impact study must be performed, if nothing else. Please do what is right for the land, animals and people and do not allow this project to move forward.
