First name: Sherry

Last name: Dutchko

Organization:

Title:

Comments: To Whom It May Concern:

Please stop raping Mother Earth and proving that the US Gov't's Word (on Treaties and Agreements) is not worth anything. Please think about the future generations and keep all the areas that the Native Americans are protecting clean and sacred, because we are all connected and we can't drink oil or ores. The earth has been cleaning and protecting you all these years. You are not helping anyone when you do these sorts of things. I am becoming ashamed of being an American because I cannot trust my own Government to keep It's word.

Sincerely,

Sherry S Dutchko, private citizen, retiree.
