Title:

Comments: I deeply value clear water and natural spaces and ask you to support the Pactola area mineral withdrawal. As we watch the current air pollution crisis in the Northeastern USA and beyond, it is clear that we must move to protect the planet -- and do it now.

I urge you to conduct an Environmental Assessment that provides a finding of "No Significant Impact" in regard to the Pactola Area.

Beyond the urgent environmental and climate implications of this matter, the Pactola area is important to the Lakota people and to everyone who values beautiful natural spaces. Please, please protect this special place.
