Comments: I hope the forest service agrees to the Pactola Reservoir-Rapid Creek Watershed Withdrawal. There MUST BE an environmental assessment EA. This is too important to the people who live there. But forcing miners to withdraw will only have a positive impact on these lands, so I expect this assessment will determine there is No Significant Impact. We cannot pollute waters that people rely on. The American history of exploitation of native people MUST STOP. We must protect the lands that are sacred to these people. We can never replace what we have taken and must stop abusing the people who are indigenous to this country.

This is too important. Thank you for your time!
