Title:

Comments: Please keep this beautiful and oxygen-conserving area for Americans and all humans; we're now down to seven years in which to, not just stop, but begin REVERSING climate change. We don't want our grandchildren or anyone's grandchildren to have to choose between suicide and slow death by starvation. Please help give humankind a chance to continue; there's no other species quite like us, and we have the ability to create a world in which ALL feeling beings can have decent lives.
