Title:

Comments: My position and utmost concern is for the quality and the quantity of water potentially being adversely affected. Our most precious resource, it is life and should be given the most protection available taking much more precedence than minerals

Common sense folks. This area is special and attributes much more revenue through public use, tourism and a quality of life than the end outcome from this proposal both immediate and long term.

If you've never been to see how the prior generations decisions can and will affect the generations to come ...
Go to Terry Peak.

I agree with the phrase I've heard recently you can't drink gold!
