Title:

Comments: As a long time resident of Spearfish South Dakota I am fully against this idea. This project will not only ruin the trails that lie in this area but completely destroy the animals' habitats. This means that the animals will need to find another area to live in and this will destroy the ecosystem.

Another reason I am against this idea is because of all of the trails that people frequently use year-round. These trails are used for biking, hiking and much more. I love mountain biking in the summer, spring, and fall up in the big hill area; and XC skiing up there in the winter.

In conclusion I am 100% against this idea and hope you take this to reconsider this plan of not only destroying our wonderful trails but also destroying the ecosystem that is up there.
