First name: Ruth

Last name: Heath

Organization:

Title:

Comments: A full EIS needs to be performed on thosdone on this. This impacts numerous hiking trails in Spearfish Canyon that are used year round. My family has been hiking these trails for over 50 years. This exploration will impact the environment of Spearfish Canyon and that full impact needs to be understood prior to allowing this to go forward. Mining exploration has no place on hiking trails that have existed for decades.
