Comments: Good evening to whoever this email sends,

I am writing on the behalf of the Lakota people and the Pactola reservoir. In America today there have been multiple states where the water has been filthy, and nothing has been done to change that. You can help give the people native and non-native clean drinking water to live on as well as protecting wildlife from poison from the toxic waters. So, as you can see, I want the Forest service to say yes to the Pactola Reservoir-Rapid creek withdrawal. I would also like for the forest service to do an environmental assessment with a finding of no significant impact, so the lake and beautiful forest hasn't been tampered with outside forces. I urge you to take this letter seriously to preserve the forests and keep the sacred land of the Lakota people safe.
