Title:

Comments: As someone who frequently visits the black hills. I love the natural beauty of the hills. When I was younger I was all about development. Now after getting to a chance to learn more about our countries history, I see the damage our previous generations did the the hills. We don't need more mines and drilling. We don't need more major investors/corporations destroying the currently used natural areas and taking the profits out of state. It's not good business for OUR people.
