Title:

Comments: Please consider completing a full environmental impact statement for this proposed project.

As a SD native who regularly used the vast resources of the Black Hills NF for recreation throughout much of my young and adult life (including regular trips in recent years to visit friends and family), I am concerned that this project potentially threatens access to trails and creeks that would rob younger, future generations from benefitting from the same experiences I was privileged to enjoy.

Please do the right thing and ensure that all regulatory hurdles are properly addressed before signing off on such a measure.
