Comments: We are very concerned about Golden Crest 's exploration drilling. in my opinion the risks are too great for our environment; especially our water.

As a citizen of Spearfish along with serving on city council; I feel a strong obligation to take away all risk to the damage they may cause.

Of course, not to mention a future of further mining witch is further risk to our environment and water

Thank you for you serious extensive research to study all the risks to this beautiful area

Respectfully,

Larry Klarenbeek
