Title:

Comments: This project cannot go through. The land, the wildlife and the people are all getting screwed over so some greedy corporate jerks can filled their pockets with literal gold. I have been hiking and camping and fishing in the Black hills since I was born and now that I live here I can't stand to see this mine take away the trails, habitat for animals and contaminate our water. There needs to be a complete EIS that confirms that no acts or regulations will be violated to ensure the safety for all residents. No to mining in the hills!!!
