First name: Joshua

Last name: Herreman

Organization:

Title:

Comments: As a long time resident and avid outdoorsman I can't think of a worse way to use our precious Black Hills. Any time you drill or mine an area that area is changed forever. You run the risk of not only damaging our water supply but our tourism and recreational opportunities. These last two are the main income and industries of this state. You cannot allow this to happen. Please make the decision to. Dismiss this in its entirety. No mining is worth the damage.
