First name: Gerard
Last name: Ridella
Organization:
Title:
Comments: We know since the early 1800's & even before that All of Nature is connected.
And Nature is the Key to slowing the Climate Crisis.
Oil companies know this key to keeping Earth inhabitable is Nature.
Mining companies know this Truth, as do most manufacturers.
But profit over Life is the driving force for Industries.
Until they are forced to comply with actions that protect rather than destroy,
Nature & Our Planet will continue to collapse until it becomes uninhabitable.
Gerard A. Ridella
