Title:

Comments: To whomever it may concern,

We must preserve the land and the planet as much as possible. The Earth needs to heal and breathe. Let some of it be untouched by man, undamaged by ego, unbothered by chemicals. Allowing the natural flow of life to exist somewhere. Using the alternatives that are available to produce the products you think you require would be better for all involved.

Consider tomorrow, today.

Let our Great Mother (Earth) be in peace.

With much Gratitude and Faith,

Concerned citizen of the Earth
