Title:

Comments: I support the Rapid Creek Watershed. You can't eat gold, or drink contaminated water. Mining is very destructive to the natural habitat, wildlife, and those who rely on clean water for their life. Native Americans have experienced too many broken treaties and intrusions on their way of life.

I want the Forest Service to say Yes to the Pactola Reservoir-Rapid Creek Watershed. An environmental assessment should be done.

This area is beautiful and deserves to remain so. Generations have lived and cared for the natural resources and been able to live in harmony with freedom to perform their ceremonies. It is morally wrong to submit harm for personal profit. Listen to Mother Earth!
