Title:

Comments: Withdrawal to include all federal lands in the Black Hills. Forest Service that these sacred lands, which nourish so many Native and non-Native communities downstream with clean water, should be preserved and pristine forever. It's never been a good outcome for the environment and the community's when mining is aloud, it poison everything. Don't let money talk. It's the people that live in the surrounding areas that have to deal with this outcome not the ones trying to get the mining right they don't care about the people or the environment or water. So please consider to reject their mining rights.
