First name: Azucena

Last name: Guzman Valdez

Organization:

Title:

Comments: Withdrawal from the Black Hills National Forest and save the planet and the future of the human race from your self-destructive mining. The earth is rapidly declining into an inhabitable planet and you'll be the cause of the extinction of the human race should we continue these practices of exploitation. You have no respect for Mother Earth, it's children or it's future but it's not too late. We must act now!
