Comments: A request to protect Mt. Emmons (Red Lady)I request that the Bureau of Land Management and United States Forest Service move forward with a federal mineral withdrawal for the lands surrounding Mt. Emmons to protect the Gunnison Valley's water quality, rural communities and their heritage.I request to protect the Thompson Divide from oil and gas development I support moving forward with a full mineral withdrawal for the entirety of the Thompson Divide Area. Oil and gas development is incompatible with the numerous other public lands resources and values in this area, including water quality and quantity, downstream agriculture, big game populations, hunting and fishing, grazing, and recreation. I am an owner of a VRBO/AIRBNB in Trappers Crossing. I generate about \$30,000 a year in tax revenue for the state of CO. This would all be lost if Red Lady is mined.
