Comments: Why would you want to destroy everything natural & beautiful just for your own personal selfish gain, you would be destroying our beautiful land & ecosystem even more than you already have. Leave Mother Earth alone to flourish even more beautifully in her natural way.

I look forward to taking my daughter here & showing her all the beauty of nature I remember always going there when I was young hiking, taking in nature as she is but how would I be able to share something that special with my daughter if you destroy it?

This is our homeland.
