Comments: I strongly endorse the plan for both the Coneygame lift realignment and for replacement of the Cirque surface lift. (No comments on the hiking / biking trail reconfiguration).

In regard to the Coneygame lift, I'm interested in what plans will be made to "connect" the Mall to the lift entrance, and how skiing from above the mall to the base village --- access to either the Village express or to the Elk Camp gondola --- will be facilitated (in particular, to avoid collisions between those skiing from above and those "walking" from the Mall to the Coneygame lift. I also assume that the Coneygame lift entrance will be configured to avoid any potential conflicts with skiers exiting the Adams Avenue trail (when it ends at Fanny Hill).

That said, the concept for the Coneygame lift is very sound, as it will alleviate crowding (and poor snow conditions in the spring) at the Village express.
