First name: Michelle

Last name: Stone

Organization:

Title:

Comments: Please protect our waters and lakes. There are so few left that are able to be preserved. If our changing climate tells us anything, it is that we need to keep our natural resources as natural as possible.

This land belongs to the Native Americans who lived here for a long time before European settlers kicked them out. The land should be returned to them, and this should be the first step.

Keep the water and the land safe.
