Comments: Yes! I am for the mining withdrawal to protect 20,574 acres of our beautiful Black Hills. As a fly fishing guide here in the Black Hills it is very important that this withdrawal goes through. Not only for the health of our fisheries but for our water quality. Allowing mining through the upper portion of the Rapid Creek water shed would destroy the healthy water system that we have. As a young avid fly fisher I want to be able to share this water system with the younger generations and we won't be able to if this withdrawal doesn't go through.
