Comments: I fully support the of Pactola Reservoir -Rapid Creek watershed withdrawal, we have come to a time that calls for healing within our lands here in the He Sapa! Water is such a sacred resource to our native people and necessary to sustain for future generations of life. It is important to maintain the health of the water that flows through the black hills. It's been important, we need to bring back the respect for it! As it is the most precious resource to our ever growing population here in the Black hills. Everyone coming in from the coasts says we have the cleanest water, the best water around, and that is to be maintained as we are in the heart of the land we all live on. As everything around us is alive, like a plant, the animals, the trees, it's all a sacred resources for the people who come from and live in the Mid West. The life that continuously gives to us, to live on everyday is a gift from the land, it's time we give back in a way that protects and sustains the land that gives. I thank y'all for taking the initiative to hear the people of the black hills and their outcry of support on this, I sincerely trust that y'all will make the right choice by heart. Withdrawal pactola reservior- Rapid Creek as watershed for the sake us of the future generations to come and for the respect to the life of water that is here. Thank y'all!
