Title:

Comments: Yes, I support the mineral withdrawal. The protected area should be expanded. An Environmental Assessment should be completed. This is important not only to protect the water quality to the community, but to protect the Sacred Paha Sapa. The supreme court opinion even stated of the theft: "A more ripe and rank case of dishonorable dealings will never, in all probability, be found in our history." It is time to live up to the ideals often professed and protect the land, sacred spaces, and all our relatives going forward. Do not continue to repeat the crimes of the past.
