Title:

Comments: Protect the forests and nature! We don't need anymore cement, tar, sidewalks, buildings, cars, and other harmful man made objects to ruin any more of the natural beauty of this great America. We need to protect the trees, the wildlife, the natural water, all of the beautiful nature of South Dakota and that means not letting anyone purchase this land and burn it to the ground. I support this withdrawal because I support nature and I support America. Please allow this withdrawal to pass so we can preserve this beautiful world we live in harmony within.
