Comments: I agree with the proposal by USDA Forest Service to withdraw 20,000 + acres (even more would be better) of NFS lands from mining, settlement, leasing and sale for at least 20 years in the Pactola and Rapid Creek watershed. Clean water is one of our greatest resources and will become even more valuable as years go on. We must take measures now to prevent further contamination of this area and jeopardizing clean water resources for future generations. Evelyn Provell 6/20/23
