Comments: I thank the Forest Service/BLM for this proposal (Pactola Withdrawal). I wish the Forest Service/BLM would take an additional supplemental action to propose the rest of the Rapid Creek drainage for mineral withdrawal.

I wish the Forest Service would take supplemental action to withdraw the 3 remaining, unprotected Research Natural Areas & all Special Botanical Areas from mineral entry, especially Sand Creek Special Botanical Area. I wish it would withdraw all Roadless Areas from mineral entry.

I wish it would withdraw any watershed that supplies drinking water to any city from mineral entry. I

I think the Black Hills were stolen from indigenous folks, with ethnic cleansing & actually the entire Black Hills should be withdrawn from mineral entry in honor of tribal claims.

However all of this does not need to be done all at once & can be done in sequential steps.
