Comments: Hello, our family owns recreational property in the Beaver Creek drainage (31 rd.) Tiller District. In 2021 the Devils Complex fire burnt up to the 31 rd. (Beaver Creek) We visit our property frequently and the burnt roadside snags are creating a significant hazard to the local traffic using the 31 rd. My recommendation would be to daylight, remove the dead snags, and reduce fuel load along the 31 rd. to reduce the roadside and fire hazard.

Thanks
