First name: Emily

Last name: Thompson

Organization: USACE

Title:

Comments: The Corps would need more information about the project to determine what activities may require authorization (a permit). A delineation of the aquatic resources within the proposed project areas would allow for impacts to be quantified, specifically for the road "maintenance" and "re-construction." The Northern long-eared bat was up-listed to endangered by USFWS recently as well. After a delineation has been completed, I would be available to discuss the project in more detail to facilitate the permitting process.

Respectfully,

Emily
