Title:

Comments: Dear Mr. Grosvenor and Mr. Jones,

I would like to thank the U.S. Department of Agriculture Forest Service, Custer Gallatin National Forest (CGNF) and the Montana Department of Environmental Quality (DEQ) for preparing the East Boulder Mine Amendment 004 Draft Environmental Impact Statement.

I believe Sibanye-Stillwater's position as the only primary producer of critical minerals platinum and palladium, as well as one of the largest global recyclers of platinum, palladium, and rhodium is important to our national security and supply chain independence. I respectfully request that the Agencies consider the following comments.

First and foremost, I support the Stillwater Mining Company's proposal for new tailings and waste rock storage facilities at the East Boulder Mine. The Stillwater Mining Company has proven over the past four decades that mining in Montana can be done sustainably and responsibly. Both platinum and palladium are on the United States Geological Survey's 2022 critical minerals list. As a global leader in Platinum Group Metal (PGM) production and recycling, as well as the only primary producer of PGMs in the United States, it is essential to our local communities, the State of Montana, and our country that the agencies approve SMC's application.

Sibanye-Stillwater is the lifeblood of our communities in south-central Montana. The company provides excellent paying jobs for nearly 2,000 residents across multiple counties and ultimately contributes over \$6 billion in economic output to Montana. If Amendment 004 is not approved, operations at the East Boulder Mine could not continue beyond 2025.

The analysis area identified in the Draft EIS only discloses impacts in Sweet Grass County. Due to the significant socioeconomic contributions of Sibanye-Stillwater in Montana, the Draft EIS should analyze and disclose the direct impacts to the neighboring counties, as well. How much tax revenue will be lost in Park, Stillwater, and Yellowstone Counties under the No Action Alternative? What is the loss of tax revenue to the State of Montana, and how does the indirectly impact all Montanans? According to a University of Montana Bureau of Business and Economic Research study, the company's operations annually contribute over \$6 billion to Montana's economic output, including over \$260 million in payroll taxes, over \$60 million in direct employee taxes, over \$500 million in additional household income, and create over 6,000 additional total jobs in Montana.

As an employee of East Boulder mine. I ask you to consider the wellbeing of my family and the family's of the miner's that work at this great company. Stopping the expansion of the mine would greatly impact the lives and the community of Montanans and national security.

I appreciate the opportunity to participate in the public process and appreciate your thorough analysis. If approved, continued operations at the East Boulder Mine is beneficial for our rural communities, Montana, and our country.

Respectfully,

Chad Morris
