Comments: Dear Mr. Grosvenor and Mr. Jones,

I would like to thank the U.S. Department of Agriculture Forest Service, Custer Gallatin National Forest (CGNF) and the Montana Department of Environmental Quality (DEQ) for preparing the East Boulder Mine Amendment 004 Draft Environmental Impact Statement.

I am an employee of Sibanye-Stillwater residing in south-central Montana and the Agencies' decision on this permit would directly affect me. I respectfully request that the Agencies consider the following comments.

First and foremost, I support the Stillwater Mining Company's proposal for new tailings and waste rock storage facilities at the East Boulder Mine. The Stillwater Mining Company has proven over the past four decades that mining in Montana can be done sustainably and responsibly. Both platinum and palladium are on the United States Geological Survey's 2022 critical minerals list. As a global leader in Platinum Group Metal (PGM) production and recycling, as well as the only primary producer of PGMs in the United States, it is essential to our local communities, the State of Montana, and our country that the agencies approve SMC's application.

Sibanye-Stillwater is the lifeblood of our communities in south-central Montana. The company provides excellent paying jobs for nearly 2,000 residents across multiple counties and ultimately contributes over \$6 billion in economic output to Montana. If Amendment 004 is not approved, operations at the East Boulder Mine could not continue beyond 2025.

Through the Good Neighbor Agreement, Sibanye-Stillwater and the GNA Councils have collaborated for more than two decades to balance the need for positive rural economic development while minimizing impacts on the physical and human environments. Through this collaborative arrangement, they have developed standards that exceed state and federal standards. Please consider acknowledging that the use of these best current available technologies, including water treatment, air quality control measures, and traffic and housing limitations, have created benefits for our communities, while limited the impacts on our environment.

By not approving this proposal this will impact not only Sweetgrass county but all the surrounding areas in south central Montana not just economically but socially a lot of the employees live in these smaller communities such as Reed Point, White Sulphur, and even as far away as Bridger. They have kids in school are on the volunteer fire depts school boards etc. In closing by not approving this proposal it's not only effecting tax base but rural Montana

I appreciate the opportunity to participate in the public process and appreciate your thorough analysis. If approved, continued operations at the East Boulder Mine is beneficial for our rural communities, Montana, and our country.

Respectfully,

Kris Knutson
