Title:

Comments: I urge approval of this project for the Afton/Star Valley area. An alternative source of energy for this area has been lacking for a long time and the construction of this pipeline will add an additional crucial alternative energy resource. I am confident that the installation will be done with quality and expertise. Lower Valley Energy is an customer owned entity and faithfully adheres to federal and state regulations as well as the highest standards of customer satisfaction.

This is not a large corporation seeking yet another source of revenue to pad it's coffers. Rather it is a reputable rural energy cooperative seeking to improve and diversify energy options for its customers.
