Comments: We strongly support making the delivery of natural gas to our community much safer by having a pipeline installed. As a home owner located in rural Star Valley, heating our home is always a concern and large expense. We look forward to safe delivery of natural gas to our valley thru this proposed pipeline. Relying on trucks to supply our extremely cold weather community with natural gas is costly and potentially unsafe. Allowing the pipeline makes sense because it would be efficient, cost effective, and safe.

A 12 inch pipe will not adversely affect the environment and wildlife of the forest lands it will cross. This is a proper use of the lands owned by the people of the United States and the State of Wyoming.

I fully trust that Lower Valley Energy, a cooperative company owned by their customers, will carry out this project in the safest and most efficient manner possible. The customers of Lower Energy want this pipeline, please expeditiously approve this project!
