Comments: Thank you for the opportunity to comment on the East Boulder Mine Amendment 004 Draft Environmental Impact Statement.

As a citizen of Sweet Grass County, I feel very strongly that the Sibany-Stillwater mine has proven over the years that it is fully committed to doing everything within their power to mine Platinum Group Metals responsibly in a pristine setting. I feel they go above and beyond industry standards in their commitment to environmental manage and control.

In summary I believe Sibany-Stillwater has accepted their reasonability and commitment to be the gold standard for mining operations. Thank You for your attention and consideration. Please approve amendment 004 of the draft EIS.
