Comments: Am opposed to the use of the stated herbicide. Once that POISON is on the earth, that cannot be undone. So the POISON is worse than the invasive plants. Then the Poison travels thru the food chain & is slow to go away. The USFS , Nationwide ,has always pushed AGENT ORANGE, 2 4 D,& other super toxic POISONS & long lived TOXINS & DIOXINS. GODDAMNIT ALREADY , how long does this TOXIC NIGHTMARE have to be used to poison the animals ,the people & the earth.? You pretend its nothing, no big deal , but the record of HARM caused by the USFS is long & extensive. While I am not a robot, I can not say the same for you, over &over again POISONS & HARM from the USFS. YOU never learn, or even pretend to care. So I vote for the no action ALT.
