Title:

Comments: Please reconsider the route for this logging project. It would make much more sense to reroute to the moose creek. If you go through with the current route, it would force the busy snowmobile area to only ride the east side of the highway. Congestion the hill area will result in many snowmobile accidents and close calls. I go every weekend and I highly recommend revising the route. Please do not take away our trails and congest the already busy and dangerous highway.
