Comments: If the route was going through Moose Creek I would be all for it. As of now the route that is planned would cause a great amount of headache for us snowmobilers. We love to ride every weekend. If the proposed route was to happen, it would leave no choice but for everyone to ride the east side of the highway, Jefferson bowl and weatherwax are already popular hill climbing areas, Throw

Hundreds of more riders at those locations every weekend and accidents are going to happen. Keeping riders spaced out is a good idea. The already busy showdown traffic mixed with snowmobile trailers and heavy trucks would not mix well. This would be a huge safety issue for not only the highway but also for the snowmobilers.

Please reconsider the route to go through moose creek out to 89 instead. Thank you
