Comments: I recommend an alternative route, through moose creek out to 89 would be a much better idea. This would be less plowing, less interruption for snowmobilers and the highway traffic. The highway is already busy with the showdown crowd and the snowmobilers. This route that is planned is unsafe for many reasons, from the highway traffic with heavy trucks on icy roads to all the snowmobilers having to ride the same area on the east of the highway. Please look into the alternative route. I'm all for logging to help fires not be as intense, just don't mess with the trails that hundreds of riders rely on everyday. Thank you
