Comments: If I had wanted a resort like Vail, I would have moved to Color ado. You're proposing to smooth out and widen several places that makes the mountain special. I'm particularly opposed to widening the Alta chutes. You have plenty of traffic up there and on most days, skiers right of Laramie is underused. Find a way to smooth out that section of the bowl if you must, but don't widen the chutes anymore then they've already been. Alta one is not even really a chute anymore. I'm also against widening the North Hoback woods. Perhaps some signage would be an easier solution to keep skiers from getting in over their heads . Last but not least, please don't do anything to Grand . It's not narrow; it's perfect as is and reducing the grade would ruin the my favorite run of the day. Jackson Hole is a wonderful place, don't ruin it in an attempt to make it more like Vail or Park City .
