Comments: I believe the logging is a good idea but wish to see a different route. How about it going from moose creek out to 89? That would have a better impact on the snowmobile community as it would not interrupt the trail system as much. Safety issues would arise if the proposed plan is implemented. The east side of the highway is already busy enough, if that was the only area for riders to ride it would be hazardous. Too many riders in one area, bound to have a collision and injuries arise. Please rethink the route. Logging is important for the ecosystem and will result in a healthier Forrest and less intense Forrest fires, just the route is my only concern. Thank you
