Comments: Divide road out to highway 89 is the only access to the west side of the snowmobile trail system. If the road is plowed for winter logging snowmobilers will not be able to access the entire west side trail system. Many users of the west side trail system do not have the skill set required to use the east side trail system. A proposed alternate route would be Moose creek road out to highway 89. A much easier route with a lot less plowing. It would also keep slow moving heavy truck traffic off highway 89 and avoid winter conflicts with Showdown vehicular traffic.

The alternate route would allow winter recreation on the west side.
