Comments: The proposed route is Divide road out to highway 89 and that is the only access to a very popular winter recreation area. Using this route will block the entire west side of the forest service approved trail system. If the road is plowed for winter logging it will make it completely impassable for over snow vehicles.

A proposed alternate route would be Moose creek road out to highway 89. A much easier route with a lot less plowing. It would also keep slow moving heavy truck traffic off highway 89 and avoid winter conflicts with Showdown vehicular traffic.

I understand the necessity to reduce fuel loads and in no way do I object to this project. I am objecting to the logging routes that will interrupt our winter recreation. With such a short season and the economic impacts on the line this should be a serious concern for all stakeholders.
