Title:
Comments: Please do not allow JHMR to alter the terrain any further by cutting trees or blasting to create new runs. The landscape is already impacted enough, and more development will negatively affect native habitats and communities.

Please listen to the community members who are lobbying against these changes, and consider their collective voice above the desires of a corporate juggernaut that is solely focused on increasing its profit margin. Despite what JHMR may claim about these "improvements" being for the benefit of the community, the community does not believe them, does not agree with them, and does not want them. It's the public's land, not JHMR's.
