Comments: THESE PROPOSED ALTERATIONS TO THE MOUNTAIN CANNOT BE UNDONE. For this reason, I highly object to any JHMR proposals that involve removal of trees or rocks and/ or blasting of rocks. Their new leadership has been a terrible steward of the mountain and should not be allowed to make any additional changes that negatively impacts the mountain's natural beauty. JHMR leadership states that they are concerned about skier safety when they are just really trying to expand their market base by making the mountain skiable by a lower and lower level of skier. JUST SAY NO!
